STAGESDASH®

Create profiles and data pages

- Add, delete, and customize data pages, change profile specific settings, and manage all profiles

Course management

- Courses from connected third parties (RidewithGPS, Strava, etc) are listed in the course section, and can be wirelessly sent to Dash for riding

Workout management

- Workouts from connected apps (Stages Link, TrainingPeaks, TrainerRoad) are displayed and can be filtered or searched and wirelessly sent to the Dash for riding

Ride management

- Activities completed and saved on Dash are displayed in a list in the Rides tab of the Dash manager
- Tap on any activity to view a summary and see the sync status of each activity to third party apps

Map management

- Maps on the Dash are listed and users can browse for any map region and request a link to a file download to add to the Dash via USB
